**Australian Pesticides and
Veterinary Medicines Authority**

**PERMIT TO ALLOW MINOR USE OF A REGISTERED AGVET CHEMICAL
PRODUCT FOR CONTROL OF ARTEMIA BRINE SHRIMP IN RED ALGAE**

PERMIT NUMBER – PER91197

This permit is issued to the Permit Holder in response to an application granted by the APVMA under section 112 of the Agvet Codes of the jurisdictions set out below. This permit allows a person, as stipulated below, to use the product in the manner specified in this permit in the designated jurisdictions. This permit also allows the Permit Holder and any person stipulated below to claim that the product can be used in the manner specified in this permit.

THIS PERMIT IS IN FORCE FROM 21 APRIL 2022 TO 30 APRIL 2024

Permit Holder:

WRS BIOPRODUCTS PTY LTD
Suite 8, 431 Burke Street
GLEN IRIS VIC 3124

Persons who can use the product under this permit:

Boyd King – Plant Manager Algae Production
Richard Anderson – Algal Technician

CONDITIONS OF USE

Products to be used:

VERTIMEC MITICIDE/INSECTICIDE (APVMA No. 50772)

PLUS OTHER REGISTERED PRODUCTS

Containing: 18 g/L ABAMECTIN as the only active constituent.

RESTRAINT:

DO NOT use if it is likely that rainfall will result in lake water run off.

Directions for Use:

Crop	Pest	Rate
Red algae (<i>Dunaliella salina</i>)	Brine Shrimp (<i>Artemia franciscana</i>)	167 µl product / 1000 L lake water equivalent to 3 mg abamectin / 1000L lake water. Plus 167 µl Hasten Spray Adjuvant / 1000 L lake water.

Critical Use Comments:

- Apply using a drip wand from a handheld container to upwind side of the pond, when an artemia bloom appears.
- DO NOT apply more than 2 applications per year.
- DO NOT apply less than 14 days after the initial treatment.
- DO NOT discharge treated water into natural aquatic habitats
- Very toxic to aquatic life. DO NOT contaminate wetlands or watercourses with this product or used containers.
- Toxic to native mammals and birds. Use deterrents to discourage birds from foraging at the site during treatment such as lamonty raptor kites on long telescopic poles if required.
- Highly toxic to bees. However, the use of this product as directed is not expected to have adverse effects on bees.
- Refer to the product label for Safety Directions and First Aid Instructions, for both the product to be used and the adjuvant.

Withholding Period:

Harvest: Do not harvest for 14 days after application.

Jurisdiction:

WA only, specifically production sites consisting of man-made ponds in Gap Ridge.

Additional Conditions:

This permit allows for the use of a product in a manner specified on the permit. Persons who wish to prepare for use and/or use products for the purposes specified in this permit must read, or have read to them, the details and conditions of this permit. Unless otherwise stated, the use of the product must be in accordance with the product label.

Treated lakes must be adequately signposted for at least 14 days after treatment warning people not to swim or consume the water.
