

PREPARING YOUR PROPERTY FOR A CYCLONE

Now is the time to:

- ☐ Trim branches near your home and clear trees from power lines.
- ☐ Check your roof and fix any damage.
- ☐ Make a list of outdoor items you need to put away or tie down.

To minimise the amount of damage to your property, before you go away on holiday during cyclone season, or when a cyclone is expected to impact on the area:

- ☐ Put away or tie down any loose material from your yard, balcony or patio, such as outdoor furniture or trampolines.
- ☐ Ensure all outdoor areas are clear of items that could become a hazard with the strong winds associated with a cyclone.
- ☐ Refuel vehicles.
- ☐ Tie down caravan, camper trailers, boats, etc.

Have your EMERGENCY PLAN in place and know where your nearest evacuation centre is.
DON'T FORGET to include your family pet/s in your plan.
